DENTAL SYRINGES

SYRINGES Petite Syringe

Petite Syringe was specifically designed to meet the needs of dental professionals who prefer a more comfortable, form-fitting syringe. Ergonomic by design, Petite Syringe features:

- Reduced thumb ring handle diameter to eliminate the excess gap, allowing just enough room for comfort and ease.
- New oval shaped ring handle that fits naturally to the shape of your thumb.
- Rounded edges on ring handle to create a smooth and soft feel.
- Slightly flared base on ring handle to ease pressure while dispensing.
- Shortened harpoon rod to reduce strain during aspiration.
- Wide wings allow for a better grip with greater control.

Articulating Barrel Syringe

loading of cartridges. This pivoting barrel is especially helpful during multiple cartridge injections because Articulating Barrel Syringe features a short barrel and a pivoting barrel that helps facilitate easy the cartridges are loaded and unloaded by placing them directly into the barrel, preventing needles from bending and eliminating the use of multiple needles. The shortened barrel is great for anterior injections and hard to access areas of the mouth. The Articulating Barrel Syringe has a removable hub which allows for the use of the 30° adapter hub for intraligamentary injections.
